

WE'RE NOT YOUR AVERAGE READY-MIXED COMPANY

FACT	BENEFIT	WHAT IT MEANS TO YOU
Metro-Mix maintains a conservative scheduling policy: we don't overbook or overcommit	Consistent, on-time delivery and improved scheduling availability. No large gaps in service.	Minimizes down-time for your crew, pump, equipment, and helps you maintain an efficient schedule- saving you valuable time and money.
Highly maintained mixer trucks with an average age of 2.5 years; GPS fleet tracking in every truck	The most dependable fleet in the industry with the fewest breakdowns or mechanical issues; GPS truck tracking enables our dispatchers to provide you with the most accurate information regarding your order.	Minimizes your risk of costly job delays and cold joints; GPS tracking lets you know in real time exactly where your trucks are, enabling you to make timely decisions and maximize productivity.
We use only the highest quality sand, rock, cement, and admixtures, along with the original Fibermesh brand fiber	Excellent performance characteristics on a consistent basis; great finishing flatwork mixes, friendly wall mixes and certified municipal/CDOT mixes; all designed for superior strength.	Why take a chance with your materials? Metro-Mix gives you peace of mind knowing the concrete you pour meets and exceeds any and all specifications which means a quality finished product and a pleased owner.
Two state-of-the-art batch plants with large boilers provide abundant hot water; Solomon automated liquid color systems	Metro-Mix produces consistent, quality concrete to meet your specific needs, exactly when you need it. Our plants won't ever run out of hot water and our Solomon liquid color system is consistent on every load.	Load to load consistency. Concrete that finishes and sets the same every load, from hot summer days to cold winter mornings- so you can get on it and get it done. Colored concrete you can count on, and your customers will love.
Training and educational opportunities on topics such as hot and cold weather concreting, scaling, and more	For smart business owners seeking to train and educate themselves and their employees, we provide the avenue with hands-on training to increase your knowledge, skills, and productivity.	Provides your company and employees the tools to succeed; the extra steps your competitors are either too lazy to take or not smart enough to recognize; the competitive edge needed in today's market.
We retain our own licensed engineer, Janet Owens-White P.E., with over 21 years of industry experience in Denver.	Janet is available to assist you with mix design issues, testing, troubleshooting, and other individual quality or engineering needs.	Having the ultimate confidence in the concrete you pour every day; knowing your concrete supplier has the knowledge and experience in-house to assist you with your specific needs.
